Weekly Coal Production

Energy Information Administration
Washington, D.C.

Production for Week Ended:
June 1, 1985

Published:
June 7, 1985

Highlights

U.S. coal production in the week ended June 1, 1985, as estimated by the Energy Information Administration, totaled 15.36 million tons (bituminous coal and lignite, 15.29 million tons; Pennsylvania anthracite .07 million tons). This was 14.1 percent lower than in the previous week, due to the Memorial Day holiday, and was 9.2 percent lower than the production in the corresponding week of 1984.

Cumulative U.S. coal production from January 1 through June 1, 1985 was estimated at 368.58 million tons, 3.1 percent below the 380.47 million tons produced in the comparable period in 1984.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DOE/EIA-0218(84/40)).
